

Optical Partnership

"Eyewear with no Frontier" (Germany)
&
Dailytec (FR) with "School for India" (FR + India)

EYEWEAR WITH NO FRONTIER (Brillen ohne Grenzen)

We are a humanitarian aid project in collaboration with various partners and collect the following items from all opticians and optical manufacturers around Europe for poor people in many countries of the world:

- 1 - Second-hand "old" glasses which are then cleaned, sorted and measured with dioptric power indication and stored in the eyewear processing centres.
- 2 - Reading glasses of all kinds.
- 3 - Second-hand sunglasses without dioptric power.
- 4 - New frames with or without lenses and new pairs of spectacles without dioptric power (end-of-series, production surplus, back stocks).
- 5 - Used optical equipment (e.g. refractometers, magnifying glasses, etc.) and tools that can still be used in the workshops of EDA opticians in poor countries.
- 6 - Recycling: as part of our ecological and environmental approach, all non-recoverable eyeglasses are recycled properly in Germany (metals and plastics).

In addition, Brillen ohne Grenzen - Germany works together with Lunettes sans Frontière - France on various projects..

SCHOOL FOR INDIA

Our association aims to promote the education of children in the state of Rajasthan. For this purpose it supports several schools in rural and disadvantaged areas of Rajasthan (northern India).

Actions of the organisation :

- 1 - Helping the education of children in India.
- 2 - Use of donations received in France or abroad for the purchase of school supplies. Use of donations received in France or abroad for the purchase of school supplies.
- 3 - Raising awareness and educating parents on the importance of schooling for their children.
- 4 - Installation of computers purchased in France or in Europe to equip schools.
- 5 - Sending medical or para-medical equipment (medicines, used glasses...)

Within the framework of the Franco-German friendships and the partnership between *Brillen ohne Grenzen* & *Dailytec*, Association "School for India" went again in August to Germany to develop the projects 2022-2023 in order to help schools and hospitals in India by sending second-hand and new glasses (end of collection) as well as second-hand optical material.

The pictures below will allow you to discover a part of the actions carried out within the framework of this partnership which started in 2021 then by the visit of Michael and Michaela ROOS (*Brillen ohne Grenzen*) at *Dailytec* in France in March 2022. Click on it to see more !

The cities of Oberkirchen - Germany and Lille - France have been made aware of these humanitarian actions which will develop rapidly over the next few months with the development of our projects in favour of the needy in India and particularly in Rajasthan.

As a reminder, "Eyewear with no Frontier" collects used eyeglasses, new frames (end of series) and second-hand optical equipment and tools from all opticians and optical factories in Europe in order to equip its centres in many countries of the world where volunteers take care of people in difficulty locally.

In addition, LSF - Lunettes sans Frontières in Hirsingue, France, has been a partner of Lunettes sans Frontières - Germany in various projects for several years.

We remain at your disposal for any further information.

Kind regards,

Michael, Michaela, Baudouin, Odile & Teams
